

Interns Wanted!

Rambus is a premier silicon IP and chip provider that makes data faster and safer. We are dedicated to delivering first-to-market, high-quality memory, SerDes, and embedded security solutions for our customers. Our embedded security solutions secure electronic systems at their hardware foundation and span areas including network security, root of trust, tamper resistance, content protection, and trusted provisioning.

Every semester Rambus Security offers internships for **Bachelor, Master, and PhD** students at our office in Vught.

Whether you fancy working on a high-speed datacentre solution such as our 800 Gbps MACsec engine, or on a root of trust for IoT where every saved gate counts, or if you fancy working on hardware designs, firmware, or drivers, please send your resume and motivation to contact below.
